Safety information

For your safety, please read the guidelines below carefully before you use your phone:

Exposure to radio frequency signals

Max. SAR measurement

EU: GSM900: 0.778 W/Kg; DCS1800: 0.285 W/Kg.

USA: PCS1900: 0.76 W/Kg (head); 0.354 W/Kg (body).

Your handheld mobile phone is a low power transmitter and receiver. When it is ON, it receives and also sends out radio frequency (RF) signals. European and international agencies have set standards and recommendations for the protection of public exposure to RF electromagnetic energy.

- International Commission on Non-Ionising Radiation Protection (ICNIRP) 1996
- Verband Deutscher Elektroingenieure (VDE) DIN- 0848
- Directives of the European Community, Directorate General V in Matters of Radio Frequency Electromagnetic Energy
- National Radiological Protection Board of the United Kingdom, GS 11, 1988
- American National Standards Institute (ANSI) IEEE. C95.1- 1992
- National Council on Radiation Protection and Measurements (NCRP).
 Report 86
- Department of Health and Welfare Canada. Safety Code 6

These standards are based on extensive scientific review. For example, over 120 scientists, engineers and physicians from universities, government health agencies and industry reviewed the available body of research to develop the updated ANSI Standard.

The design of your phone complies with these standards when used normally.

Specific operating restrictions

No metallic component allowed in body-worn accessories.

Phone operation

- Normal Position: Hold the phone as you would with any other telephone.
- To avoid potential RF interference, please do not wear the phone around your neck or in front your chest for long hours.

Batteries

- For safety concerns, when the temperature of the phone goes over 45°C (113F) or below 0°C (32F), charging will halt.
- Do not expose batteries to temperatures below -10°C (14F) or above 45°C (113F). Always take your phone with you when you leave your vehicle.
- Use only genuine batteries to ensure the phone's normal operation.

All batteries can cause property damage, injury or burns if a conductive material such as jewelry, keys or beaded chains touches exposed terminals. The material may complete the electrical circuit and become quite hot. To protect against such unwanted current drain, exercise care in handling any charged battery, particularly when placing it inside your pocket, purse or other container with metal objects. Your batteries are packaged with a protective battery cover; please use this cover for storing your batteries when not in use.

Driving

Check the laws and regulations on the use of mobile phones in the areas where you drive. Always obey them. Also, if using your phone while driving, please:

- Give full attention to driving--driving safety is your first responsibility.
- Use handsfree operation, if available.
- Pull off the road and park before making or answering a call if driving conditions so require.

Electronic devices

Most modern electronic equipment is shielded from RF signals. However, certain electronic equipment may not be shielded against the RF signals from your wireless phone.

Pacemakers

The Health Industry Manufacturers Association recommends that a minimum separation of six (6") inches be maintained between a handheld wireless phone and a pacemaker to avoid potential interference with the pacemaker. These recommendations are consistent with the independent research by and recommendations of Wireless Technology Research.

Persons with pacemakers:

- Should ALWAYS keep the phone more than six inches from their pacemaker when the phone is turned ON.
- Should not carry the phone in a breast pocket.
- Should use the ear opposite the pacemaker to minimise the potential for interference.

If you have any reason to suspect that interference is taking place, turn your phone **OFF** immediately.

Hearing aids

Some digital wireless phones may interfere with some hearing aids. In the event of such interference you may want to consult your hearing aid manufacturer to discuss alternatives.

Other medical devices

If you use any other personal medical device, consult the manufacturer of your device to determine if they are adequately shielded from external RF energy. Your physician may be able to assist you in obtaining this information.

Turn your phone **OFF** in health care facilities when any regulations posted in these areas instruct you to do so. Hospitals or health care facilities may be using equipment that could be sensitive to external RF energy.

Vehicles

RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles. Check with the manufacturer or its representative regarding your vehicle. You should also consult the manufacturer of any equipment that has been added to your vehicle.

Posted facilities

Turn your phone OFF in any facility where posted notice so requires.

Aircraft

FCC regulations prohibit using your phone while in the air. Switch **OFF** your phone before boarding an aircraft.

Blasting areas

To avoid interfering with blasting operations, turn your phone **OFF** when in a "blasting area" or in the area posted "TURN OFF TWO-WAY RADIO." Obey all signs and instructions.

Potentially explosive atmospheres

Turn your phone **OFF** and do not remove the battery when in any area with a potentially explosive atmosphere and obey all signs and instructions. Sparks from your battery in such areas could cause an explosion or fire resulting in bodily injury or even death.

Areas with a potentially explosive atmosphere are often, but not always clearly marked. They include fueling areas such as gasoline stations; below deck on boats; fuel or chemical transfer or storage facilities; vehicles using liquefied petroleum gas (such as propane or butane); areas where the air contains chemicals or particles, such as grain, dust or metal powders and any other area where you would normally be advised to turn off your vehicle engine.

For vehicles equipped with an airbag

An airbag inflates with great force. **DO NOT** place objects, including both installed or portable wireless equipment, in the area over the airbag or in the airbag deployment area. If in-vehicle wireless equipment is improperly installed and the airbag inflates, serious injury could result.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- 1. this device may not cause harmful interference, and
- this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

For body-worn operation, this phone has been tested and meets the FCC RF exposure guidelines for use with an accessory that contains no metal and that positions the handset a minimum of 1.5 cm from the body. Use of other enhancements may not ensure compliance with FCC RF exposure guidelines. If you do not use a body-worn accessory and are not holding the phone at the ear, position the handset a minimum of 1.5 cm from your body when the phone is switched on.

European Union Directives Conformance Statement

Hereby, BenQ Mobile, declares that this CF61 is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC. The relevant declaration of conformity (DoC) has been signed. Please call the company hotline if you require a copy of the original or visit:

Permanent hearing loss may occur if you use ear- or headphones at high volume. You can adapt over time to a higher volume, which may sound normal but can be damaging to your hearing. Set your volume to a safe level. If you experience ringing in your ears, reduce the volume or discontinue use of your system.

Please dispose of unwanted batteries and phones as permitted by the laws in your country.

Preparing your phone for use

Removing the back cover

- 1. Use a thin object such as a finger nail to press in at the groove just below the cover on the centre top edge of the phone as illustrated.
- 2. Lift the cover off the phone

Inserting a SIM card

Slide the entire SIM card into the slot in the direction of the arrow shown on the compartment, with the metal contacts of the SIM card facing down and the cut corner at the top left as illustrated.

If you wish to remove the SIM card, first press down the locking tab, then slide the SIM card out in the direction of the arrow as illustrated.

Locking tab

A SIM card can be easily damaged if its metal contacts become scratched. Take special care when holding or inserting it.

Installing a battery

- 1. Slide the top end of the battery down into the bottom end of the battery bay.
- 2. Press the bottom end of the battery down so that it locks into place.

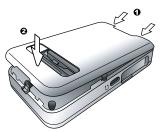

Do not remove the battery when the phone is on. Doing so could cause you to lose personal settings or data stored either on your SIM card or in the phone's memory.

Installing the back cover

Insert the tabs on the inside bottom edge of the back cover into the slots on the bottom of the phone, then swing the cover down onto the phone to lock into place.

Charging the phone

- Insert the charger connector fully into the charger socket on the left edge of your phone. Ensure that the connector is plugged in with the side showing the arrow icon facing you.
- 2. Plug the charger into a power outlet.

Do not remove the battery while the phone is charging.

Once the phone is fully charged, remove the charger from both the power outlet and the phone.

Please note:

- It takes approximately 4 hours to fully charge a battery.
- · When the battery is weak, the phone will play an alert sound.

 When the battery is discharged, charging may not start immediately when you plug in the connector. Wait 10 to 15 minutes for the phone to begin charging.

2. Long-press ot turn the phone on. The phone will display the

Turning the phone on

1. Open the flip.

welcome animation. In this user manual, "long-press" means to press and hold down a key for about two seconds. "Press" means to press a key and release immediately. To set a welcome message, go to: Settings > Display > Welcome Message. For details, please refer to page 78. 3. Enter your PIN code and press — to confirm. The PIN (Personal Identification Number) is the password provided by your network operator. You need this password in order to use the SIM card If you enter the PIN incorrectly three times in a row, the SIM card will be locked. You must now enter the PUK (Personal Unblocking Key) for that SIM card in order to unlock it. Please contact your network operator to obtain a PUK. To activate/disable PIN password authentication, go to Settings > Security > PIN Code > PIN 1 Code > Set Status. See page 86.

4. When the PIN code entered has been accepted, the phone will automatically search for the designated network. This search process

4 Preparing your phone for use

may take a few seconds.

The standby screen will be displayed, as well as network signal strength and the name of the network operator. You can now use the phone.

If the phone is not able to detect the designated network, or links to a network that you are not authorised to use, the signal strength meter will show no bars. You will only be able to make emergency calls.

The miniSD card

Your phone features a miniSD slot designed specifically for use with the miniSD card, a removable flash memory card intended to add greater storage capacity to your phone.

The miniSD card enables you to store multimedia data, including images, photos, MP3 audio files and ringtones.

Installing the miniSD card

- 1. Lift the cover on the left side of the phone.
- Insert the miniSD card fully into the slot until it clicks into place. Ensure that the card's metal contacts face upwards.
- 3. Close the cover.

Do not format the miniSD card to FAT32 or NTFS.

Removing the miniSD card

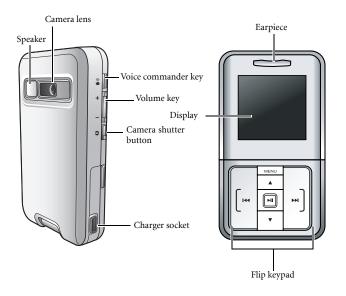

- 1. Lift the cover.
- 2. Press the miniSD card to release it.

Getting to know your phone

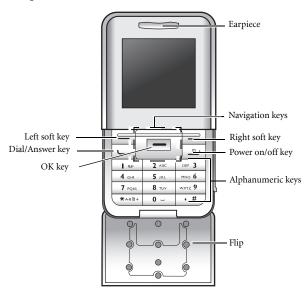

Your phone at a glance

Front closed, left and back

The flip keypad is used for performing the MP3 function and for answering and ending a phone call.

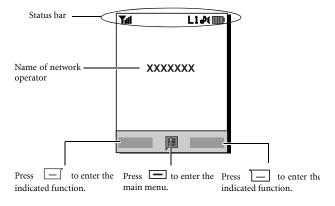

Front open

Right and bottom

Standby screen

- To set the wallpaper of the display, go to Settings > Display
 > Wallpaper. Alternatively, you can go to Media Centre
 > Images. See page 66 and page 78.
 - To set the theme of the display, go to Settings > Display
 Theme. See page 78.
 - To set the current time and date, as well as the format to be shown, go to Settings > Date & Time. See page 76.
 - To enter text (such as the user name) to be displayed on the standby screen, go to Settings > Display > Personal Banner.

Icons in the status bar

Icon	Function	Description	
Yall	Signal strength	Signal strength of the network. The more bars indicated, the stronger the signal.	
<u> </u>	Battery status	Current level of battery power. The more bars indicated, the more power remains.	
G	GPRS in use	GPRS has been activated.	
	Message	You have new SMS/MMS messages.	
<u>©</u>	WAP message	You have new WAP messages.	
\bowtie	Message Full	Capacity for messages is full.	
2	Corrupted/ Incomplete message	The message is corrupted/ not downloaded completely.	
0.0	Voicemail	You have new voicemail messages (this icon will only appear if the function is supported by your network operator).	
10	Alarm	Alarm is turned on.	
m]	Keypad lock	Keypad is locked.	
L1 / L2	Line1 or Line2 in use	Line1 or Line2 is now in use.	
ah≨	Normal	The Normal profile is activated.	
88	Meeting	The Meeting profile is activated.	

lcon	Function	Description
×	Silent	The Silent profile is activated.
<u>©</u>	Outdoors	The Outdoors profile is activated.
0	Personal	The Personal profile is activated.
D	Stereo Headset	A stereo headset is connected to the phone.
L / 로	Divert	The call divert is activated.
Δ	Roaming	Roaming is activated (not within your regular network).
*	Bluetooth	Bluetooth is turned on.
	miniSD Card	miniSD card is loaded.

Using the keys in standby mode

Key	Commands and functions
<u></u>	Power on/off key Long-press to turn the phone on or off. Press this key to end a call, reject an incoming call, or to cancel a dialling procedure.
	Press to send or answer a call. Press to access the call record list.
	Press to perform the function indicated on the bottom left of the display. To designate the function to be accessed by the left soft key, go to Settings > Key Assignment. See page 79.
	Right soft key Press to perform the function indicated on the bottom right of the display. To designate the function to be accessed by the right soft key, go to Settings > Key Assignment. See page 79. Long-press to turn the silent profile on or off.

Key	Commands and functions
	OK key and Navigation keys
	Press to enter the main menu or to confirm.
	Use the navigation keys
	Asterisk key
	Press this key to enter an asterisk " * ".
★ A-B ① +	To make an international call, long-press this key until the display shows "+", then enter the recipient's country code, area code and phone number.
Voicemail key	
(LD)	Long-press to dial your voicemail number.
	# key
	Press to enter "#".
↑ (3D0 #	For extensions: After entering a phone number, long- press to enter a "P" and then enter the extension number.
	When playing music, press to create a 3D sound effect.
	Alphanumeric keys
	Press to enter digits.
0 □ ~ wxyz 9	Shortcut key: Long-press a key to access the function immediately, or dial the number that it represents. See page 71, "Shortcuts".

Key	Commands and functions
+	Volume key (on the left side of the phone indicated by + and -) • Long press the upper or lower portion of the key to adjust ringtone volume.
•	Camera shutter button (on the left side of the phone indicated by) Long-press to activate the camera mode. See page page 32, "Using the Camera"
ŝ -	Voice Commander key (On the left side of the phone indicated by ((*9)) Long press to turn Voice Commander on. See page page 40, "Voice Commander (Speech-to-music/ Speech-to-dial)".

Menu navigation

- 1. In standby mode, press
 to bring up the main menu.
- Use the navigation keys to scroll up, down, left or right through the menu. For example, scroll to Settings, and press to enter its menu.
- 3. Use to scroll to a submenu, for example **Profiles**, and press to enter the submenu item.
- You can also access a menu item by pressing the corresponding menu number. In the above example, press def 3 to access Profiles

Call functions

Making a phone call

In standby mode, enter the phone number. Press \(\subseteq \) to dial your call.

Ending a phone call

To end a call, do one of the following:

- With the flip closed, press on the flip keypad.
- With the flip open, press or close the flip.

The display will show the total call time as you end a call, and then return to standby mode.

Answering a phone call

To answer a call, do one of the following:

- With the flip closed, open the flip or press on the flip keypad.
- With the flip open, press .
- If you wish to press any key to answer a call, go to Settings > Call Settings > Answer Mode > Any Key.

Rejecting an incoming call

To reject an incoming call, do one of the following:

- With the flip closed, press on the flip keypad or long-press the upper portion of the volume key on the left side of the phone.
- With the flip open, press or close the flip.

Muting the ringtone for an incoming call

When there is an incoming call, you can mute the ringtone by long-pressing the lower portion of the volume key - . You still can answer the call after the ringtone has been turned off.

Making an international call

- Enter the recipient's country code, area code and phone number. Dial the call by pressing ____.

Making an emergency call

To call emergency services, enter 112 (the international emergency number) and then press _____ to dial the call. You can make an emergency call even if your phone is locked or cannot access your network, or there is no SIM card inserted, as long as you are within range of a network of the type supported by your phone.

Dialling an extension number

- 1. After entering a phone number, long-press • • until "P" appears.
- 2. Enter the desired extension number, then press ____ to dial it.

Speed dialling

You must assign a number key as the shortcut for a particular phone number in order to use speed dialling for that phone number. For information on how to set up a shortcut, see page 71, "Shortcuts".

After you have assigned a number key to serve as the shortcut key for a particular phone number, long-press this key when the phone is in the standby mode to dial the corresponding phone number.

Listening to voicemails

Long-press
to dial the voicemail phone number and listen to your voicemails.

Please note:

- If the network provider supports it, the voicemail icon will appear on the display when you have new voicemails.
- If the voicemail number is not stored in the memory, you will not be able to
 access your voicemail by long-pressing . In this case, you will need
 to set the number manually by going to Messages > Voicemail > Set
 Number.

Operations during a call
The following options marked with an asterisk (*) are dependent on network support and may require a subscription.
Using the loudspeaker
Press (Loudsp.) to turn on the loudspeaker. To turn off the loudspeaker, press (Handset).
Adjusting the volume
To adjust the speech volume during a call, press the volume key on the left side of the phone.
Adjusting speech volume only works during a call.
Putting a call on hold*
• When only one call is active:
a. Press (Hold) to hold this call.
b. Press o to end this call.

- a. Press (Unhold) to resume the call.
- b. Press o to end this call.
- When there is an active call and a call on hold.
 - a. Press (Swap) to resume the call that is on hold, and put the active call on hold.
 - b. Press of to show a list of calls that you can end.

Making a second call*

Enter a phone number, or select one from the Phone Book or call record, and then press _____ . The currently active call will automatically be placed on hold.

Call waiting*

If there is an incoming call while you are on the phone, the phone will notify you with a call waiting tone. If you want to

- Answer the waiting call: Press _____. The currently active call will
 automatically be placed on hold. However, if there is already
 another call on hold, a list will appear allowing you to select a call
 to end and then answer the waiting call.
- Reject the waiting call: Press or (End).
 Pressing (End) will immediately reject the waiting call; pressing will bring up a list allowing you to select a call to end.

Call menu

Pressing during a call will bring up a call menu which provides a number of functions available during a call.

Items marked with an asterisk (*) depend on network support and may require a subscription.

Use Headset

Allows you to use the Bluetooth headset. For more information, see page 54, "Establishing a connection with your Bluetooth headset".

Use Loudspeaker/Handset

Turns the loudspeaker function on/off.

Phone Book

Allows you to search for a number in the Phone Book.

Call Records

Allows you to view missed, received and dialled calls.

Conference*

Conference calls allow you to converse with more than one party at a time.

Hold/Unhold/Swap*

Toggles the call status.

Ioin/Private

Adds a party that is on hold to the current conference call, or isolates a single party in a conference call and puts all other parties on hold.

Transfer

Allows two parties to connect, while ending one's own call (one of the two parties may be involved in an active call while the other is either on hold or being dialled), so as to allow the two parties to have their own call.

Send DTMF

When the phone is connected to other devices or services, you can send DTMF (Dual Tone Multi-Frequency) strings. Your phone will emit tones to communicate with answering machines, pagers, computerised telephone services and so forth.

Enter the number and then press ____ to send the DTMF string.

End Call

End All

Ends all calls, whether active or on hold.

End Active

Ends only the active call.

End Hold

Ends only a call or calls on hold.

End One

Ends only a single call by the number or the contact.

Anonymous

Ends a call not showing its number.

Hold/Unhold/Swap

Toggles the call status.

Mute/Unmute

Activates/cancels the silent mode.

SMS

Allows you to access the Messages menu during a call. For details see page 42, "Messages".

Calculator

Allows you to use the calculator. For details see page 72, "Calculator".

Using the Phone Book

Adding contacts to the Phone Book

The capacity of a phone book on your SIM card depends on the type
of SIM card provided by your network operator.

- In standby mode, enter the phone number that you want to save, then press (Save).
- Select the memory where the contact is to be stored. Select from either Add to SIM or Add to Phone.
- Scroll to the data field that you want to edit, and then press to enter data.
- 4. Press ____ to return to the contact data screen after filling in the field.
- 5. Press (Option) to
 - Save: Save the contact data you have entered.
 - Change Type: Change the category of the phone number (for example, from Mobile Number to Home Number). This option can only be used in the phone number data field.
 - Add New Field: Adds additional data fields for a contact.
 - Delete Field: Removes the selected data field.
- Once you have completed editing, press (Option) and select
 Save to save contact's details.

Phone book fields on SIM card memory

Name	The contact's name.				
Number	The contact's phone number.

Using your phone

Using the silent profile			
In standby mode, you can long-press to activate the silent profile. Once it is activated, the phone will alert you to an incoming call by vibrating without ringing.			
1. When you long-press to activate the silent profile, the phone will vibrate for one second. The icon will appear in the status bar.			
2. To turn off the silent profile, long-press			
To select or define a profile, go to Settings > Profiles . See page 77, "Profiles".			
Using the MP3 player			
You can upload music from a computer to your phone using Bluetooth or the supplied USB data cable. Refer to page 53, "Bluetooth and USB connections" for details.			
Unsupported files will be skipped over during playback.			
Turning the MP3 player on			
Do one of the following:			
• With the flip closed, long-press on the flip keypad.			
• Choose Entertainment > MP3 Player.			
You can turn on the MP3 player by pressing only when is set as the shortcut key for the MP3 player. See Settings > Key Assignment on page 79.			

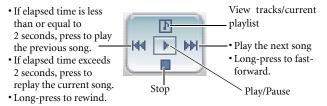

Playing the music

Using the flip keypad (with the flip closed)

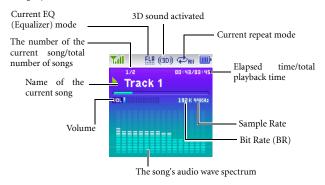

Using the phone keypad (with the flip open)

Use and the navigation keys according to the on-screen keypad shown below.

MP3 playback screen

- Tracks will be played in the sequence they are saved. To play tracks in a random order, press (III) and select **Settings > Use Shuffle**.
- When a Bluetooth headset is connected, volume can only be adjusted from the headset.

Using the MP3 player menu

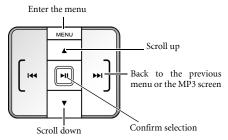

Opening up the MP3 player menu

Do one of the following:

- With the flip closed, press MENU on the flip keypad.
- With the flip open, press (III) on the phone keypad.

Navigating the MP3 player menu using the flip keypad

In addition to the handset keypad, you can also use the flip keypad as shown below to navigate the menu.

Playing all the tracks

- 1. Select Tracks.
- 2. Scroll to the desired track and press ____. The MP3 player will play all the tracks in the order they are saved.

Building your playlist

- You can only use the handset keypad to build a playlist.
- 1. Select Playlists.
- Press (Option) to select Add.
- 3. Name the playlist in the Add Playlist screen, and press 🖃 to save.
- 4. When asked to add tracks to the new playlist, press $\boxed{-}$ (Yes).
- 5. Scroll to the track you want to add, then press to select the track. Repeat the step to include multiple tracks in the playlist.
- Select All to select or deselect all tracks.
- 6. Press (Done) to save the setting.

- 1. Select Playlists.
- 2. In the Playlists screen, scroll to the desired playlist and press .
- Select the desired track and press _____. The MP3 player will play the tracks on the selected playlist.

Playing music in the background

During playback, select **Minimize Player** to hide the MP3 screen and keep music playing in the background.

When a Bluetooth headset (A2DP) is in use, you cannot minimise the Player window.

Setting the repeat mode

Select **Settings** > **Set Repeat** to decide whether to play the present track (**One**) or all tracks (**All**) repeatedly.

Playing songs randomly

Select **Settings** > **Use Shuffle** to play tracks in a random order.

Showing lyrics during playback

Select **Settings** > **Show Lyrics** to have the lyrics displayed during playback.

The supported lyrics format is ID3v2.3.

Adjusting the volume

Press to adjust the volume during playback.

Using the headset

To listen to MP3 using the headset, select **Settings** > **Use Headset**.

For details on using the Bluetooth headset, see page 53, "Bluetooth".

For accessories that are compatible with your phone, please contact your local BenQ Mobile office to inquire about availabilities and detailed information

Setting the EQ (Equalizer) mode

Select **Settings** > **Set EQ** to choose your preferred EQ mode that will influence the sound during playback.

Setting up A-B Repeat

The MP3 Player supports A-B Repeat--continuous repeat of playback between selected points--which is ideally suited for use in language learning.

- 1. During playback, press (***\hat**) once at point A--the start point of the portion you would like to repeat. The icon appears indicating that point A is set.
- 2. Press (*Antal) once more to set point B--the end marker. The icon then appears indicating that the preferred portion's A-B repeat is set, and the player will start to repeat playback between the selected points.
- 3. To cancel A-B Repeat press ★A-B®+ again.

Setting the 3D sound

Select **Settings** > **Use 3D Sound** to produce 3D sound effects during playback.

Producing 3D sound effects

Press or select **Settings** > **Use 3D Sound** to produce 3D sound effects during playback.

(When a Bluetooth headset (A2DP) is in use, this feature is not available.

Setting the display mode

Select **Settings** > **Display Mode** and set the display mode of the MP3 player.

Locking the flip keypad in MP3 mode

With the flip closed, press MENU and select **Keypad Lock** to lock the flip keypad keys.

To unlock the keypad, press MENU and then III, or simply open the flip.

Using the Camera

Your phone features a digital camera that allows you to take a picture to be set as an image ID or wallpaper, or to be sent in an MMS.

Taking pictures

- To activate the camera mode, on the idle screen long-press the camera shutter button () or choose the menu: Entertainment > Camera.
- 2. The viewfinder is then displayed.

- 3. Press (Option) to bring up the settings menu. For functions of various settings, see page 33, "Adjusting camera mode settings".
- The icons on the screen will be changed according to the settings you have made. For a description on each icon, see page 34, "Icons in camera mode".
- 4. When the viewfinder appears, press the left and right navigation keys to adjust the exposure value; press the up and down navigation keys to zoom in or out
- The zoom function will be disabled when the image size is set as 1280 x 960).

picture will be saved to the phone memory or to the minis automatically according to the setting you have made. For the optio

Managing your pictures

- 1. Press (Option) and select View Photos.
- 2. Select the desired folder, if any.
- 3. Scroll to select a desired picture, and press
 to display it in full.
- 4. Press (Option) to bring up the available options for the picture.

Name	Options
Send	Allows you to send the picture by MMS (size is limited to 100 kilobytes) or by Bluetooth. For details on MMS and Bluetooth, see page 45 and page 53.
Delete	Deletes the picture.
Set	Allows you to set the picture as Wallpaper for the standby screen, or as Image ID for a new/existing contact or caller group.
Edit	Allows you add a frame, a stamp and rotate the picture.
	Allows you to crop the picture.
	Select the desired size of the picture to be cropped.
Tailor	Press
	3. Press to cut out the desired portion.
	4. Press again to save the cropped picture.
Face Morph	Allows you to generate various facial expressions according to the four spots you have manually positioned over the picture. See instructions below.

Name	Options
Move	Allows you to move the picture to the miniSD card or phone memory, or to a designated folder.
Сору	Allows you to copy the picture to the miniSD card or phone memory, or to a designated folder.
Slideshow	Allows you to view the pictures you have taken in a slideshow.
Browsing Mode	Allows you to view the pictures in a list or in thumbnails.
New Folder	Allows you to create a new folder to store pictures.
Protect	Protects the picture from deletion.
Unprotect	(Available when a picture is protected) Frees the protected picture.
Rename	Allows you to rename the picture.
Delete All	Deletes all the pictures.
Details	Shows the details of the picture including its name, resolution and file size.

Face Morph

1. Activate the face mask and take a photo.
2. Press and select Face Morph.
If you wish to apply an expression to a photo in the Media Centre, display the photo in full size and press — four times consecutively to place red spots in the corners of the eyes and the corners of the mouth, which are normally used to make facial expressions.
To remove a red spot, press . Press to have the spot reappear. Use the navigation keys to move the red spot around.
3. Press and the message "Press Number Key to Change" appears.

- To generate an expression, press a corresponding number key, the meaning of the generated expression is shown at the top left of the screen.
- Press (Normal) to display the original picture with no expression effects made.
- Press the left and right navigation keys to reduce or intensify expression effects.

Voice Commander (Speech-to-music/Speech-to-dial)

With Voice Commander you can make voice digit diallings, call contacts and play MP3 tracks by saying corresponding voice commands to the phone.

Please refer to page 97, "Appendix: Voice Tags" for command tags used to activate functions provided in **Voice Commander** (Speech-to-music/Speech-to-dial) in different languages.

Before you start using Voice commander

- Make sure the language set in your phone is the same language as the one set for the voice commander tags.
- To change the language setting of the phone, go to **Settings** > Language.
- Make sure that all your files are named in the same language as the one set for the voice commander tags.
- Please limit the length of file names to 20 characters maximum.
- The phone can store up to 1000 voice tags, including contacts and music files. When the memory is full, you will have to delete unused contacts and music files in order to continue.

Voice Commander settings

To use Voice Commander successfully, you need to go to **Tools** > **Voice Commander** to complete the following settings:

Information synchronisation for voice commands

To ensure that the phone recognizes the voice commands containing the names of contacts and MP3s, turn **Auto-Sync** on or select **Sync Now**.

Voice digit dialling training for the phone

You can say the phone number you want to call and the phone dials it for you. For better accuracy and speedier dialling, you can teach the phone to recognize the way you say numbers.

- 1. Select Digit Training.
- Say the digits displayed on the screen. Once the phone recognizes the digits you say, it will display the next string of digits. To complete the training the phone needs to recognize 10 different strings of digits that you say.

Using Voice Commander

Four voice commands are available: Play Music, Search Music, Call [contact], and Digit Dial.

- 1. Long-press the Voice Commander key 🔓 on the left of the phone to turn Voice Commander on.
- After hearing the prompt "Please say ..." say one of the voice commands available.
- 3. Follow the instructions on the display to complete the command.

Play Music

- 1. Say "play music" after being prompted.
- The MP3 player will start playing the first track in the Now playing list.

Search Music

- 1. Say "search music" after being prompted.
- Say one of the following: "Track [name of the track]"/"Artist [name of the singer]"/"Album [name of the album]."
- 3. When a match is found, say "confirm" after being prompted and the track will start to play. Say "cancel" to stop.

Call [contact]

- 1. Say "call [name of the contact]" after being prompted.
- 2. When a match is found, say "confirm" after being prompted and the phone will dial the phone number. Say "cancel" to stop or press

when the flip is closed to end the connection.

If more than one choice is available, select the desired contact and press to play. When the flip is closed, press \(\bigcirc\) to scroll up/down.

Digit Dial

- 1. Say "Digit Dial" after being prompted.
- 2. Say the number you wish to dial after the prompt.
- 3. If the phone number identified is correct, say "confirm" after being prompted and the phone will dial the number. Say "cancel" to stop or

when the flip is closed to end the connection.

Messages

Your phone supports various messaging services including SMS (Short Messaging Service) and MMS (Multimedia Messaging service). SMS allows you to insert simple animations and ringtones into your text messages, while MMS enables you to send pictures, coloured images and music through your phone. You must have a subscription that supports MMS. Please contact your network operator for details.

To enter the Messages menu, select

in the main menu.

SMS

Receiving a new message

1. When you receive a new message, the icon and a text message showing the number of messages appear on the display.
2. To read the message, press Option). For details about managing received messages, see page 44, "Managing Inbox".
If you return to the standby screen without reading the new message, will remain on the standby screen's status bar to remind you of the unread message.
Creating a new message
 To bring up the message editing screen, go to SMS > New. Use the alphanumeric keys to enter text. For information on the input method, see page 50, "Input methods".
To insert a preset text, image, melody, contact data (vCard) or Calendar memo (vCalendar) into the message, press (Option) and select Insert. You can also define your own preset text. See page 44, "Defining quick message templates".
3. To align texts, press (Option) and select Alignment.
4. When you have finished editing the message, press to Send Message, Save to Drafts, Save to Private Folder, or Discard the message.

Read messages saved on the phone or on the SIM will be marked by or . Unread messages saved on the phone

To decide where new messages will be saved to, go to

Cleaning up messages

To clean up messages, go to **SMS** > **Cleanup**. You can choose to delete messages by category.

Settings

Your phone is already set up to send or receive messages. Contact your network operator for details.

MMS

In order to use MMS, you have to subscribe to both GPRS and MMS services provided by your operator. Contact your operator for details on MMS settings.

Downloading new messages

If you set MMS > Settings > Deferred Download on, the operator will send you a notification when you receive new messages; no messages will download to the phone before being prompted. Press if you wish to download the message.

Reading a message

Having successfully downloaded the MMS message, a text message showing the sender's name or address appears on the display. Press to play the MMS message page by page.

Creating a new message

- To write and send a new MMS message, go to MMS > New. To edit
 the message content, scroll to the Content: and then press _____.
 Press _____ (Option) to execute the following tasks:
- Insert: Allows you to insert photos, images, melodies, text, vCard (contact data), vCalendar (calendar memo) or new pages.
- Preview: Plays all the pages in the message in sequence.

- **Remove Image**: Removes the image or photo inserted in the page.
- **Remove Melody**: Removes the ringtone inserted in the page.
- Remove Text: Removes entered text.
- Remove Page: Removes the current page.
- Previous/Next Page: Go to previous or next page.
- Page Duration: Sets the length of time that each page is displayed when playing the message.
- For Input options, see page 50, "Input methods".
- 2. After you have finished creating the MMS message, press
 to return to the main list, which includes the following items.
- To: Enter the recipient's phone number or select a contact from your phone book by pressing **1** — [(Browse). To send your message, this field cannot be left blank.
- Subject: Allows you to enter text for the subject.
- Content: Contains the message that you created.
- Cc: Allows you to send the message as a carbon copy to others.
- Bcc: Allows you to send the message as a confidential carbon copy to others.
- **Priority**: Allows you to set the priority for this message.
- Receipt: Allows you to set if a confirmation is to be sent back to you when the message has been delivered, read, or both.
- 3. Press (Option) and select Send Message to send the message.

Managing Inbox

Your phone saves incoming messages in the Inbox. To manage Inbox messages, go to MMS > Inbox. A list of received messages appears. To view a message, scroll to it and press .

Managing Outbox

Go to **MMS** > **Outbox**. The Outbox stores failed messages and messages to be sent until they are successfully delivered.

Managing Sent Items

Go to MMS > Sent. The Sent folder stores messages that were successfully delivered.

Managing Drafts

Go to **MMS** > **Drafts**. The Drafts folder contains message drafts that you chose to save. To edit a draft, scroll to it and press —.

Managing Private Folder

Go to MMS > Private Folder. The phone code is required to enter Private Folder.

The default phone code is 1234. To change the phone code choose the menu **Settings** > **Security** > **Phone Lock**.

Templates

To use the preset MMS templates, go to **MMS** > **Templates**.

Cleaning up messages

To clean up messages, go to MMS > Cleanup. You can choose to delete message by category.

Settings

To set up advanced settings for MMS, go to MMS > Settings.

Filter

Your phone will reject all MMS messages from the senders listed here.

Expiry

Sets the length of time your outgoing MMS message stays on the server before it reaches the recipient successfully.

Reply Type

You can determine here whether you want to use an SMS message or MMS message in reply to an MMS message you have received.

Size Limit

Sets the maximum size for a message that the phone receives. If an incoming message exceeds this size, the phone will not be able to download that message.

Server Info

Activates the MMS server used for sending and receiving MMS messages.

Deferred Download

When set to On, the phone will only download the sender's details. You can then decide whether you want to download the whole message.

Delivery Report

Asks the recipient to return a confirmation after receiving your MMS message.

Read Report

Asks the recipient to return a confirmation after reading your message.

Voicemail

Get Voicemail

Dials the voicemail number provided by your network operator to access your voicemail box.

In standby mode, long-press I to access your voicemail box.

Set Number

Allows you to save your voicemail phone number.

Cell Broadcast

Cell broadcast messages are messages that your network operator broadcasts to all phones within a particular area. These messages are broadcast in numbered channels. For example, channel 030 might be for local weather, 060 for traffic reports, 080 for information about local hospitals, taxis, pharmacies and so forth. You can receive cell broadcast messages that your network operator broadcasts, and select your preferred topics and languages.

For more information about available channels and a list of the information they provide, contact your network operator.

Receive

To activate the cell broadcast feature, set this option to On.

Topics

You can enter the desired range of topic numbers (channel numbers) which represent the broadcast information that you have selected to receive from your network operator.

Language

You can limit the cell broadcast information that you receive from your network operator to a specific language.

Memory Status

Shows the amount of used and available memory on the phone.

Input methods

When an editing screen is displayed, the current text input method is indicated in the upper right corner of the screen. The phone has the following input methods.

Ab.	Multitap text input
112	Numeric input
19 61	T9 text input

Changing the input method

When an editing screen is displayed, press repeatedly until the input method you want appears.

Shifting between upper and lower case letters

When an editing screen is displayed, long-press to shift between lower case, upper case and caps lock letters.

Multitap text input

Entering text using multitap text input

- You must press the key corresponding to the desired letter the correct number of times in order to enter the letter you want. Display letters for entry according to the order shown on each key. Pressing a key once will display the first letter listed on the key, while pressing it twice will display the second letter, and so on.
- When you have entered a letter and wish to enter the next letter, either
 wait for two seconds until the cursor moves to the next text entry
 position, or immediately press the key for the next letter.
- Press 0 to enter a space before beginning a new word. Long-press
 0 to feed a new line.
- While entering text, use the scroll key to move the cursor.
 Press (Clear) once to delete one character; long-press (Clear) to delete all entered text.

Options when using multitap text input

When entering text using multitap text input, you can access the following options by pressing (Option).

- Symbols: Opens the symbol table.
- **Input Methods**: To switch to another input method.
- Cases: To switch to lower or upper cases, or to use Caps Lock.

T9 text input

Entering text using T9 text input

Press each key associated with the letter you want to enter only once.
 The letters you have entered appear on the display. The candidate words will change with each key you press.

- If the first highlighted word is not the word you want, scroll to highlight the desired word.
- If you do not find the word you want in the list of candidate words, that
 means the word you intend to enter is not a valid word in the
 dictionary. Press (Spell) to open the spell check box, which
 allows you to create your own word into the dictionary. The next time
 you enter the word, it appears as one of the candidate words.
- Once the correct word is highlighted or is entered, press to enter the word.
- Short-press O to enter a space before beginning a new word. Longpress O to feed a new line.
- While entering text, use the navigation keys to move the cursor. Press
 (Clear) once to delete a character; long-press
 (Clear) to delete all entered text.

Options when using T9 text input

When entering text using T9 text input, you can access the following options by pressing (Option).

- Spell: Opens the spell check box to allow you to create your own word into the dictionary.
- Symbols: Opens the symbol table.
- Input Methods: To switch to another input method.
- Cases: To switch to lower or upper cases, or to use Caps Lock.
- T9 Settings: Enable Choice List to show the list of candidate words when you enter letters. Enable Auto Completion to complete the predicted word (if it was entered before), and use the navigation keys to display alternative words.

Numeric input

The numeric input method allows you to use the alphanumeric keys

1 to wxyz 9 enter numbers.

Entering symbols

To open the symbol table, press **\text{Model}*. Press **\text{Model}* again to open the next page. Scroll to highlight the desired symbol. Press ** to place the symbol in the text.

Bluetooth and USB connections

Bluetooth

Your phone features Bluetooth technology which allows you to have a wireless connection between your phone and your Bluetooth devices.

Adding a Bluetooth device to your phone

- If you go to Tools > Connection > Bluetooth > Turn On to turn on Bluetooth, you will be asked to search for and add Bluetooth devices. Press (Yes) to begin searching.
- Alternatively, you can go to Tools > Connection > Bluetooth > Add Device. The phone then begins searching.
- When a list of available devices appears on the screen, select a device to connect to and press
- When a message appears asking for your permission to connect to this device, press (Yes) to connect.
- Enter the passkey for the device, both in the phone and in the device that you are connecting to.
- 6. When the passkey is accepted, the device is paired.

Establishing a connection with your Bluetooth headset

1. Go to Tools > Connection > Bluetooth > Turn On to turn on the
Bluetooth.
 You will be asked to search for and add Bluetooth devices, press (Yes) to begin searching. Make sure that your Bluetooth headset is switched on and is in "pairable mode".
When a list of devices appears on the screen, select a device to connect to and press
4. When a message pops up, press (Yes) to connect.
5. Enter the Bluetooth headset passkey and press 🖃 .
Please check the user manual of your Bluetooth headset for this passkey.
When the passkey is accepted, the headset is paired. The Bluetooth connection is established automatically.
Sending an item using Bluetooth
You can send the items in your phone such as images, melodies, vCards (Phone Book records), or vCalendars (Calendar events) to another Bluetooth device. When you select By Bluetooth as the Send method, a list of the once connected Bluetooth devices that can transfer data appears. Select an available device to connect to and press .
Managing your Bluetooth devices
Go to Tools > Connection > Bluetooth > Devices . Select a device from the list, and press (Option) to access a list of options.

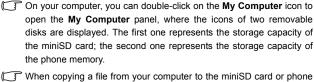

USB Connection

You can establish a USB connection to a computer using the USB data cable.Go to Tools > Connection > USB Connection

- 1. Turn the phone on.
- Connect the phone to the computer using the phone's data cable. Plug the cable's smaller end into the data cable jack on the right side of the phone, and the bigger end into the computer's USB port.
- The phone will display a USB Connection menu. Select the desired task from the following:

Mass Storage

To transfer files between the computer and the miniSD card/phone memory, select this option. With connection established and detected by your computer, the miniSD card and the phone memory will function as a removable disk.

When copying a file from your computer to the miniSD card or phone memory, you must place the file in the folder intended for the type of file. For example, an MP3 file must be placed in the MP3 folder in order to be used successfully in the phone.

Modem/PC Sync

To synchronise the phone with your computer to transfer Phone Book data or Calendar memos, select this option. The phone can also work as a modem to let you connect your computer to the Internet.

Before activating the data synchronisation or the modem function, make sure you have installed onto your computer the software tool designed for use with the phone.

MTP

MTP stands for Media Transfer Protocol, which standardises the way computers with Windows installed transfer data to portable media devices.

To transfer files protected by Microsoft Digital Rights Management (MS-DRM), you need to select MTP to activate Windows Media Player 10, which is used for transferring MS-DRM protected files from a computer to the phone.

- System requirements:(1) Windows XP, (2) Microsoft Service pack 2 and above, (3) Windows Media Player 10 (version 10.00.00.3990 is recommended).
 - 1. After you select MTP, an MTP Media Player window pop ups on the computer. Select Synchronise Media Files To This Device to open up Windows Media Player.
 - 2. The synchronisation screen will display for you to copy files.
 - On the right side of the synchronisation screen, you can choose to copy files to Flash (phone memory) or to the miniSD card.
 - We strongly recommend that no more than 200 files be transferred at the same time for better speed.

The phone features various functions that are organised in the menus and sub-menus. The main menu consists of nine categories. Each category has related sub-menus.

For information about navigating menus, see page 13, "Menu navigation".

Phone Book

Find

Used to locate a contact in the Phone Book. Enter the first letter to view a list of contacts beginning with the letter. Scroll to the contact you want to find. See page 23, "Finding contacts in the Phone Book" for details about what to do after locating a contact.

Add

Used to add a new contact to the Phone Book. See page 21, "Adding contacts to the Phone Book" for details.

Edit

Used to edit a selected contact.

Copy

Used to copy contacts stored in the phone to the SIM card, or copy contacts stored in the SIM card to the phone. You can also select to copy an individual contact.

Delete

Deletes a contact from the phone book. You can delete one contact at a time, or delete all contacts at once.

Caller Group

Caller groups are combinations of phone settings used to identify a particular group of contacts.

- Press (Option) to select the ringtone (Ring ID) or image (Image ID) used to identify a particular caller group, or to rename the caller group.
- 2. Press to view the contacts in the selected caller group. Press (**Edit**) to add or remove contacts.

Privacy Manager

This option allows you create a list of calls that you wish to accept (**Accept List**) or a list of calls that you wish to reject (**Reject List**). Set this function to Off if necessary.

- 1. Scroll to the list you need and press (View).
- Press (Option) and select Add or Edit to add contacts to the list.
- On the Privacy Manager menu, scroll to the list you wish to activate, then press ____.

Business Card

Allows you to enter your own business card information.

- 1. Scroll to the data field you wish to edit, then press ____ to enter text.
- Press (Option) and select Save to save all the entered data, or select Send vCard to send this business card in a short message.

My Number

This option allows you to store your phone number and name.

Memory Status

Shows you the number of entries that have been stored, and the maximum entries that can be stored, on the SIM and on the phone.

Messages

For a description of the features available in the Messages menu, see page 42, "Messages".

Call Records

This menu includes a list of your missed calls, dialled calls and received calls. Call costs and time are also recorded.

Missed

Shows your most recent missed calls.

See page 24, "Last missed, dialled and received calls" for details.

Received

Shows your most recent received calls.

See page 24, "Last missed, dialled and received calls" for details.

Dialled

Shows your most recent dialled calls.

See page 24, "Last missed, dialled and received calls" for details.

Cleanup All

Deletes all of the call records.

Duration

This feature is only accessible if supported by your network operator.

Last

Shows the duration of the last call.

All

Shows the total time for all calls.

Received

Shows the total time for all received calls.

Dialled

Shows the total time for all dialled calls.

Reset

Resets all call time records.

Cost

The cost calculation requires the support of the network operator.

Last

Shows the cost of your last call.

A11

Shows the total cost of all calls.

Reset

Resets all call cost records.

Requires entry of the PIN2 code.

Limit

Shows the current limit set for total call costs.

Settings

Allows you to set the unit price and a currency for calculating call costs.

Requires entry of the PIN2 code.

Games

You can play the games embedded in the phone, or download Java applications directly to your phone.

All Games

Embedded games and downloaded Java games are stored in this menu. To find out how to play these games, please read their on-screen instructions.

Settings

Internet Setting

If the Java application activated requires an Internet connection, you need to select the appropriate network access point here. To configure network access point settings, go to **Services** > **NAP settings**. See page 76, "NAP Settings".

Java Version

Shows the phone's Java virtual machine version.

Memory Status

Shows the amount of used and available memory on the phone and on the miniSD card for Java applications.

Camera

For information on using the camera, see page 32, "Using the Camera".

MP3 Player

For information on using the MP3 Player, see page 25, "Using the MP3 player".

FM Radio

- To listen to the FM radio on your phone, first connect your stereo headset to the phone.
- For accessories that are compatible with your phone, please contact your local BenQ Mobile office to inquire about availabilities and detailed information.
- Go to Entertainment and select FM Radio.
- Press to turn on the radio.
- 3. Press the up navigation key to view a list of previously saved channels.
- Press the left and right navigation keys to scan channels in sequential order.
- Press and hold the left and right navigation keys to rapidly scan for channels with signals.
- 6. To adjust the volume press the volume key

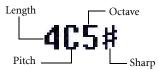

7. Press (Option) to access a list of options.
Save Channel: Allows you to save the current channel in the Channels list.
• Set Frequency : Enter the frequency of a channel to access it directly.
• Record: Allows you to record the current channel being listened to.
To listen to recordings, go to Entertainment > Recorder.
• Set as Alarm Tone: Sets the current channel as the alarm ringtone.
• Use Loudspeaker: Turns the loudspeaker on.
The stereo headset must remain connected to the phone even if the loudspeaker is turned on.
Recorder
1. Press (Option) and select Save to decide whether recordings
are to be saved on the miniSD or in the phone memory.
2. Press to record.
3. Press to stop recording.
4. Press the up navigation key to open up the Recordings list and select the recording to play.
5. Press the down navigation key to pause/resume playback.
6. Press to stop playback.
6. Press to stop playback. 7. To adjust the volume press the volume key.
7. To adjust the volume press the volume key

Composer

You can edit your own polyphonic ringtones, and use them as alert sounds for incoming calls.

A polyphonic ringtone consists of musical tones in multiple channels. The Composer function allows you to create a maximum of 8 channels, mixing them to create the final polyphonic ringtone.

Note format

Entering default notes

Press key 1 to key 7 to enter quarter notes in the middle octave: **4C5**, **4D5**, **4E5**, **4F5**, **4G5**, **4A5** and **4B5**.

"4" on the left indicates a quarter note; "5" indicates the middle octave.

Entering a default rest

Press * to enter a quarter rest: 40.

Adjusting the length of a note

Press key 8 to increase the note's length (the number on the screen will increase); press key 9 to reduce the note's length (the number on the screen will decrease). Various note lengths are represented by the numbers shown in the chart:

On-screen number	1	2	3	4	5	6	7	8
Note length	1/16	1/8	3/16	1/4	3/8	1/2	3/4	1

Adjusting a note's octave

Press key 0 to adjust a note's octave. The octave of a note is represented by the numbers shown in the chart:

On-screen number	Represented octave
4	Lower octave
5	Middle octave
6	Higher one octave
7	Higher two octaves

Adding a	sharp	to a	note
----------	-------	------	------

Press to add a	sharp '#', which raises the note a semitone. To
remove a sharp from a	note, press .
A sharp cannot be	e added to the E and B notes.
C4 f4:	1 1

Steps for creating a polyphonic ringtone 1. Select a channel to start composing music.

- 2. To modify a note, move the cursor to the right of the note that you wish to change. You can then proceed with adjusting the length,
- octave, sharp/unsharp and so on. Press (Clear) to delete a note highlighted by the cursor.
- 3. When editing the music in a channel, press (Option) to access the following options:
 - Play
 Plays the notes in the channel.
 - Instrument
 Allows you select the instrument that will play the notes in the channel.
 - Time Beat
 Sets the tempo.

- 4. After you have finished editing the notes in the channel, press = to return to the channel list. You can now repeat the above steps to create another channel of music.
- 5. When you have finished with all the channels, press (Option) in the channel list screen to access the following options:

Play All

Plays the polyphonic ringtone that results from mixing all channels.

• Play Channel

Plays the channel you have currently scrolled to.

Save

Selecting the option will mix all the channels into a polyphonic ringtone, which will be saved to: **Media Centre** > **Music** > **Composings**.

Media Centre

Digital Rights Management

This phone features the Digital Rights Management (DRM) technology (OMA DRM v.1.0 and MS DRM 10). DRM allows for copyright-protected audio/visual content transmissions for playback on computers, portable devices and network devices, while protecting them from unauthorised use.

Images

Images stores pictures and images saved in the phone or on the miniSD.

- 1. Select the desired folder and scroll to the desired picture.
- Press = to display the selected picture. Scroll up or down to display the next or previous picture.

- 3. Press (Option) to perform the following:
 - Send: Allows you to send the picture by SMS, MMS or Bluetooth.
 - For information on using Bluetooth, see page 53, "Bluetooth".
 - Delete: Deletes the picture.
 - Set: Allows you to set this picture as the wallpaper, an image caller ID or a group image ID.
 - Move: Allows you to move the picture to the miniSD card or phone memory, or to a designated folder.
 - Copy: Allows you to copy the picture to the miniSD card or phone memory, or to a designated folder.
 - Protect: Allows you to protect the picture from deletion.
 - Rename: Allows you to rename the picture.
 - Delete All: Deletes all pictures.
 - Details: Shows details of the picture.

Music

Music stores audio files including MP3s, default ringtones, recordings and the ringtones you created using the Composer function.

- 1. Select the desired folder and scroll to the desired audio file.
- To access the Private folder, you must enter the phone code (default: 1234).
- Press to play the music of the file.
- 3. Press (Option) to perform the following:
 - Send: Allows you to send the picture by SMS, MMS or Bluetooth.
 - For information on using Bluetooth, see page 53, "Bluetooth".
 - Delete: Deletes the selected MP3 file.
 - Set: Allows you to set the MP3 for incoming calls or as a ring ID for a specified contact or a caller group, or as alarm tone.

- Move: Allows you to move the file to the miniSD card or phone memory, or to a designated folder.
- Copy: Allows you to copy the file to the miniSD card or phone memory, or to a designated folder.
- New Folder: Allows you to create a new folder.
- Protect: Allows you to protect the file from deletion.
- Rename: Allows you to rename the file.
- Delete All: Deletes all files.
- · Details: Shows details of the file.

Other

Other stores files whose formats are not supported by the phone.

Format miniSD

This option will delete all the files stored on the miniSD. The phone code is required to execute this option.

Memory Status

Shows the amount of used and available memory on the phone and on the miniSD.

Alarm

- Select the alarm to set.
- 2. Press the left and right navigation keys to turn the status on.
- 3. Scroll to an option and change the setting as needed.

Frequency

Allows you to select the days you want the alarm to sound.

Time

Allows you enter the time for the alarm to sound.

Time Duration

Allows you to set the length of the alarm.

Alarm Tone

Allows you to set the ringtone of the alarm.

- 4. To save all your current alarm settings, press (Save).
- 5. When setting is saved, 🎁 will appear in the display's status bar.
- When the alarm rings, you can:
- Press (Snooze) to stop the alarm, the alarm will ring again five minutes later.
- Press ____ (Exit) to turn off the alarm, the alarm will not ring until the next scheduled time.

Connectivity

For information on Bluetooth and USB connections, see page 53, "Bluetooth and USB connections"

World C	locks
---------	-------

This feature displays current local time and date for major cities around the world.
To make use of the World Clocks feature you must set your phone's time and date correctly. To do this, go to Settings > Date & Time .
To decide which cities' time and date you want to display:
1. Press (Edit) to bring up a list of cities.
2. Press to mark the cities. To unselect a city, scroll to that city and press
3. With desired cities selected, press — (Done).
Calendar
Calendar allows you keep track of upcoming events. You may set the
alarm to ring when it comes to the date.
 When you open the Calendar, the phone will show the calendar for the current date. Scroll to the date you want to write a memo on. You can also press (Option) and select the Go to Date.
2. When the desired date is highlighted, press (Option) and select Add to open the memo editor.
3. Edit the data fields in the memo editor as needed. Press
4. To send a memo by SMS or by Bluetooth, select the preferred memo, then press (Option) to select Send vCal .
For information on using Bluetooth, see page 53, "Bluetooth".
5. To auto delete the memos, press (Option) and select the Auto Delete After. Select the timeframe in which you want the deletion to be auto executed.

To Do List

To do list allows you to keep track of a list of tasks.

- 1. To add a new to do item, press (Option) and select Add.
- 2. Write your memo. Press 🖃 to save the memo.
- 3. If there is any to do item on the list that has already been completed, you can scroll to the item and press ____ to mark it. Then press ____ (Option) and activate Auto Delete, which will automatically clear any to do items you have marked as completed.

Note

Note allows you to write down quick notes. You can set a password protection for the notes.

Shortcuts

Allows you to assign 8 alphanumeric keys as shortcuts to commonly used functions or frequently dialled numbers.

(is assigned to voicemail dialling and you are not allowed to change it.

Setting shortcuts

- Scroll the selection box to the number key you wish to use as a shortcut key. You can also press the actual alphanumeric key to select it.
- To add a function, press (Option) and select Add Function.
 To add a phone number, press (Option) and select Add Phone.
 See step 3 if Add Function is selected. See Step 4 if Add Phone is selected.
- From the function shortcuts list, scroll to select an item. Press to save the assigned shortcut.
- From the contact list, scroll to select a contact. Press to save the assigned shortcut.

5. Repeat the above step to add or modify function shortcuts.
6. To cancel a shortcut key and restore the key's original function, scroll to the shortcut key you want to cancel, and then press (Option). Select Delete to cancel the shortcut.
Using shortcuts
There are two ways to use shortcuts:
• In standby mode, long-press an alphanumeric key to access its assigned shortcut.
• Select Tools > Shortcuts . You can then:
 a. Scroll to move the selection box to the icon corresponding to the desired key. Then press to access its assigned shortcut.
b. Press the corresponding alphanumeric key to access its assigned shortcut.
Calculator

Allows you to use the phone as a calculator.

- 1. Enter numbers using alphanumeric keys; To enter a decimal point press **A=B=1 or _____ .
- Perform calculations using the navigation keys and as indicated on the Calculator screen.
- 3. Press (B.Space) to delete numbers and symbols entered.

Currency Converter

Currency converter allows you to convert currencies and set the exchange rate.

 To set the currencies for conversion, press (Option) and select either Currency 1 (to set the currency at the top of the screen) or Currency 2 (to set the currency at the bottom of the screen).

2.	То	set	the	exchange	rate,	press		(Option	and	select	Rate
	Set	ting	. To	enter a dec	imal j	point p	ress 🗱	or [

Enter the currency amount. The result will appear in the other currency field

Stopwatch

Stopwatch allows you to measure time intervals.

- 1. Press ___ to start the stopwatch.
- While the stopwatch is running, press (Split) to save each elapsed time.
- 3. Press ___ to halt the stopwatch.
- 4. Scroll to view the list of elapsed times.
- 5. To reset the stopwatch, press (Reset).

Countdown Timer

Countdown timer allows you to specify a length of time to count down.

- 1. Enter the length of time you want to count down.
- 2. Press and the timer starts counting down to zero.
- 3. Press to halt the Countdown Timer.
- 4. To reset the Countdown Timer, press (Reset)

Voice Commander (Speech-to-music/Speech-to-dial)

Used for configuring the Voice Commander settings. See details on page 40, "Voice Commander settings".

Your phone features a WAP browser, allowing you to use the phone for mobile Internet connectivity. To use the phone to get online, the necessary WAP and GPRS settings must be made.

To activate mobile Internet connectivity, consult your network operator for WAP and GPRS services. In general, the network operator will automatically transmit the needed settings to your phone. If not, you will need to configure the necessary settings manually. For further details, contact your network operator.

WAP Service

Start Browser

Starts up the browser and connects to the homepage.

Browsing a webpage

Referring to the soft key commands that appear on the screen, press and to perform needed tasks while browsing a webpage. Scroll up or down until the item you want is highlighted, and then press to select it.

Ending the online session

While online, press o to close the browser and return to the previous menu.

WAP Messages

When you receive a new WAP message, will be shown on the display. This option will start up the browser so you can read the WAP message.

74 Menus

Go to URL

Allows you to link to the URL you enter.

WAP Settings

Allows you to configure settings for different network operators' WAP servers, and then select the desired server to get online.

- 1. Scroll to the desired server and press (Option).
- Select Add Profile to establish settings for a new server, or select Edit to configure the selected server's settings:
 - Profile Name: Gives the WAP server a name.
 - Homepage: Sets the homepage that the browser will link to when it is started up.
 - IP Address: Enter the IP address used for accessing the mobile Internet.
 - Port: Enter the connection port specified by the network operator.
 - NAP: If you use a GPRS network, select GPRS NAP (Network Access Point) settings or CSD NAP settings to get online. If you use a dial-up network, you are restricted to selecting only the CSD NAP settings to connect to the Internet.
 - To configure GPRS NAP settings or CSD NAP settings, choose Services > NAP Settings.
- 3. Press (Save) to save the settings.
- 4. Scroll to the server that you would like to use and press (OK) to confirm your choice.

Clear Cache

Clears webpage content that the browser temporarily stores in memory.

NAP Settings

Used to configure GPRS or CSD settings according to the network type used by the phone.

For detailed information on how to configure GPRS and CSD settings properly, contact your network operator.

Service Number

Provided by your network operator if the service is supported. For further details, please contact your network operator.

STK Menu

This SIM Tool Kit (STK for short) Menu is only available if provided by your network operator. For details, contact your network operator.

Settings

Date & Time

Used to set the time and date, as well as the format that will be displayed on the standby screen.

- Date: Allows you to set today's date.
- Time: Allows you to set the current time.
- Format: Allows you set the format in which the date and the time will be displayed.
- Time Zone: Allows you to select a time zone where you are.
- Auto Time Zone: With this feature turned on, the time displayed on the phone will auto switch to the local time where you are.
- Requires the support of the network operator.

76 Menus

Auto Power On/Off

Allows you to specify a time for the phone to be automatically turned on or off.

When on an aeroplane, be sure to deactivate the Auto Power On/Off feature.

Profiles

A profile is a group of settings that determine whether the phone will alert you to incoming calls through a ringtone or a vibrating alert, and how ringtones in general are used on the phone. These settings allow the phone's operations to best suit the environment you are in.

- Scroll to the desired profile and then press to activate this profile.
 You can choose from among the following profiles:
- Normal: This is the default profile.
- Meeting: The options in this profile have been preset to suit a meeting
 environment.
- Silent: The options in this profile have been preset to suit an environment where silence is required.
- Outdoors: The options in this profile have been preset to suit an outdoor activity.
- Personal: Allows you to use this profile for a group of custom settings.
- 2. To customise settings, scroll to a profile and then press (Edit).
- You cannot modify settings in Silent mode.
- Vibrate: Decides whether the phone will vibrate when there is an
 incoming call.
- Call Ring: Allows you to set the ringtone that will sound when there is an incoming call.

- Message Tone: Allows you to set the ringtone that will sound when there is a new message.
- Calendar Tone: Allows you to set the ringtone that will sound when your calendar event approaches.
- Keypad Tone: Decides whether the keypad will sound when keys are pressed.
- Ring Volume: Allows you to adjust the ring volume. Scroll up or down to adjust it.
- Restore: Allows you to reset the profile to its default configuration.

Display

- Theme: You can change the appearance of the display. Select different themes to change the display colour and background.
- Wallpaper: Designates the wallpaper used for the standby screen.
- Welcome Message: Allows you create a welcome message to be displayed when the phone is turned on.
- Personal Banner: Allows you to enter text to be displayed on the standby screen.
- Brightness: Allows you to adjust the brightness of the display to appear lighter or darker. Scroll up or down to adjust it.
- Backlight Duration: Allows you to specify how long the keypad backlight remains on after the last key is pressed.

Audio

- Call Ring: Allows you to set the ringtone that will sound when there is an incoming call.
- Message Tone: Allows you to set the ringtone that will sound when there is a new message.
- Calendar Tone: Allows you to set the ringtone that will sound when your calendar event approaches.
- Keypad Tone: Decides whether the keypad will sound when keys are pressed.
- Ring Volume: Allows you to adjust the ring volume. Scroll up or down to adjust it.
- Speech Volume: Allows you to adjust the speech volume. Scroll up or down to adjust it.

Key Assignment

Allows you to assign functions to the left and right soft keys and navigation keys. When functions have been assigned, you can access them by pressing their corresponding keys in standby mode.

- 1. Scroll to the desired key and press .
- 2. Select the function to be assigned to the key and press .
- 3. When you are ready to save the assignments, press (Save).

Call Settings

Answer Mode

- Any Key: Allows any key except to be used to answer an incoming call.
- Send Key: Allows incoming calls to be answered only by pressing .
- Automatic: If the Automatic answer mode is activated, the phone will ring for five seconds, and then the incoming call will be answered automatically.

Only the Handsfree profile allows this setting.

Connect Alert

This feature allows the phone to ring, vibrate or flash the backlighting when the recipient of a call has answered.

Minute Minder

You can have the phone beep at the specified interval during a call.

- 1. Press the navigation keys to set the status to On.
- Scroll down to the Duration field to specify the interval of time at which the phone emits a beep during a call.
- 3. Press ___ to save this setting.

Show Number

Decides whether your phone number will be displayed on the recipient's phone when you make a call. Select **Preset** to allow the default set by the network operator.

Call Divert

This feature allows you to divert calls to a designated phone number or voicemail box.

Requires the support of the network operator.

Divert All

Diverts all incoming calls.

When Busy

Diverts incoming calls when you are in the middle of another call.

No Reply

Diverts incoming calls when you do not answer.

Not Reachable

Diverts incoming calls when your phone is turned off or outside network coverage.

Cancel All

Cancels all call divert options.

Call Barring

You can request that your network operator block the dialling or receiving of certain calls. To activate or cancel any of the options below, you must enter the network password provided by the network operator.

Requires the support of the network operator.

All Outgoing

Blocks dialling of any calls from the phone.

Intl. Out

If this option is activated, no international calls can be made with your phone.

Intl. Except Home

If this option is activated, your phone can only be used to dial local calls and calls to your home country from abroad. Other international calls will be barred.

All Incoming

Rejects all incoming calls.

Incoming When Roaming

If you are in another country (using roaming), activating this option will cause the phone to reject all incoming calls.

Cancel All

Cancels all call barring settings. You must enter the network password in order to cancel these settings.

Change Password

You can change the network password, which can be obtained from the network operator.

Call Waiting

If there is an incoming call when you are in the middle of another call, the screen will display the waiting call message to alert you.

Requires the support of the network operator.

Auto Redial

If there is no answer at a number you have dialled, the phone will automatically redial.

Fixed Dialling No.

After this feature is activated, the phone will only be able to dial numbers on the Fixed Dialling Number list. If a number is not on the list, calls cannot be made to this number.

To activate or cancel this feature, you must enter the PIN2 code.

If the PIN2 code is entered incorrectly three consecutive times, the PIN2 code will be locked down. You will need the PUK2 code to unlock the PIN2 code. Contact your network operator to obtain the PUK2 code.

To create a Fixed Dialling Number list,

- 1. Press (View), then press (Option) and select Add.
- Enter the PIN2 code, and then add a new number to your Fixed Dialling Number list.

Active Line

This feature allows you to use two different phone numbers on one phone. You can designate one number for dialling calls, while accepting incoming calls dialled to both numbers.

Requires the support of the network operator.

User Group

- User Group: Used to create a closed group of callers based on a service provided by the network operator. The members of a User Group can call each other, but cannot conduct calls with anyone outside the group unless special provisions are made.
- Outside Access: When the User Group service is activated, enabling Outside Access will allow users in the group to make calls to numbers outside the group. However, incoming calls will still be restricted to calls within the group.

Network

Generally speaking, the network that your phone uses is configured automatically. When turned on, the phone will automatically connect to the network provided by your network operator, or will automatically connect to the roaming network when you are outside the coverage of your regular network. When outside the coverage of your regular network, you can manually select the local network system.

Your network operator must be able to support network selection in order for you to use this feature.

Network Mode

Allows you to set the network searching to automatic or manual.

 Automatic: If this option is selected, when outside the coverage of your regular network the phone will automatically scan for an available network.

84 Menus

• Manual: If this option is selected, when outside the coverage of your regular network the phone will list all the networks of telecom providers and allow you to choose.

Available List

The phone will list all the available networks so that you can manually choose the preferred one.

Not all the networks listed will necessarily be available for use. If you require further information, contact your network operator.

Band Setting

Allows you to set an appropriate band in the GSM network system.

Connection

Allows you to set whether the phone will search for a GPRS network when it is turned on.

- GPRS & GSM: When it is turned on, the phone will search for available GPRS and GSM networks.
- **GSM Only:** When it is turned on, the phone will search only for a GSM network.

Security

You can use various codes and locks to prevent unauthorised use of the phone.

PIN Code

The PIN (Personal Identification Number) is the password provided by your network operator. When PIN code authentication is activated, it will prevent unauthorised use of the SIM card. You need this password in order to use the SIM card.

If you enter the PIN incorrectly three times in a row, the SIM card will be locked. You must now enter the PUK (Personal Unblocking Key) for that SIM card in order to unlock it. Please contact your network operator to obtain a PUK.

- PIN1 Code: Used to activate, deactivate or change the PIN1 Code.
 To change the PIN1 Code, select Set Status and set to On. Enter PIN1.
- PIN2 Code: Used to change the PIN2 code. The procedure is the same as for the PIN1 Code.

Phone Lock

Once the phone lock is activated, you will be required to enter the phone code when the phone is turned on. You must enter the correct code to unlock it (the default phone code is 1234). When the phone is locked, you will only be able to make emergency calls.

SIM Lock

When activating the SIM Lock, you must enter the previously set SIM Lock password (the default SIM Lock password is 1234). The password must be between 4 and 8 digits. Once the SIM Lock is activated, you will be required to enter the SIM Lock code to use another SIM card on your phone.

Auto Keypad Lock

Used to create a keypad lock. When the flip is closed and you have not used the keypad for a specified period of time, the keypad will be locked. Scroll to set the status **On**, and select the time duration of inactivity before the keypad lock is to be activated.

Power Saving Mode

Activating this mode will turn off the keypad backlighting and the brightness of the display backlighting will be reduced to conserve battery power.

Language

Allows you to select the language that the phone will use.

Input

Allows you to set the default input methods that will be used in the text input mode.

Flight Mode

When you are on a flight where the use of mobile phones is prohibited, select this option so that the phone will not link to any network, and the alarm, and calendar reminder will also be turned off. However, you can still use the entertainment features such as playing MP3 music or taking pictures in this mode.

When the Flight Mode is activated, X will display on the status bar.

Q-Fi Mode

When the phone is in Q-Fi mode, GSM and GPRS services will not be accessible. FM radio and Bluetooth transmission (to send/receive data or listen to music via a Bluetooth headset (A2DP)) functions will be available.

When the Q-Fi Mode is activated, X will display on the status bar.

Restore

Restores all the settings to their factory default.

Requires entry of the phone code (default is 1234).

Take note of the points below to ensure that you use the phone properly and to extend the lifespan of the phone.

- Store the phone and its accessories out of the reach of children.
- Keep the phone and accessories dry, and use the phone in environments where the temperature is between -10°C and 45°C. High or low temperatures outside this range may damage the phone.
- If possible, do not use or store the phone in excessively dusty or dirty environments.
- Do not remove the warranty seal on the phone yourself, nor allow an unauthorised dealer to do so.
- Do not use strong detergents or organic solvents to wipe or clean the phone.
- If your phone or its accessories are not operating normally, contact an authorised dealer immediately.
- Use only genuine accessories such as batteries, battery charger and
 handsfree kit to ensure the phone's normal operation and preserve
 battery life, as well as protect the safety of your person and belongings.
 Use of non-genuine accessories will not allow your phone to achieve
 optimal performance, and may cause the phone to malfunction. Any
 malfunctions or damage caused by the use of third-party accessories
 are not covered by the terms of the product warranty, and will
 invalidate the product warranty.
- Do not allow objects that may discharge electricity to come into contact
 with the charging socket on the bottom of the phone or the metal
 contacts on the battery, as this may cause short circuits and put you in
 danger.

6 Limited Manufacturer's Guarantee

Without prejudice to any claim the user (customer) may have in relation to the dealer or retailer, the customer shall be granted a limited manufacturer's Guarantee under the conditions set out below:

- In the case of new devices and their components exhibiting defects resulting from manufacturing and/or material faults within 12 months of purchase, BenQ shall, at its own option and free of charge, either replace the device with another device reflecting the current state of the art, or repair the said device.
- This Guarantee shall be invalid if the device defect is attributable to improper treatment and/or failure to comply with information contained in the user manuals.
- This Guarantee shall not apply to or extend to services performed by the authorised dealer or the customer themselves (e.g. installation, configuration, software downloads). User manuals and any software supplied on a separate data medium shall be excluded from the Guarantee.
- The purchase receipt, together with the date of purchase, shall be required as evidence for invoking the Guarantee.
- Ownership of devices or components replaced by and returned to BenQ shall vest in BenQ.
- This Guarantee shall apply to new devices purchased in the European
 Union and Turkey. For Products sold in Turkey that are imported by
 BenQ Mobile Telekomünikasyon ve Iletişim Hizmetleri Ticaret
 Limited Şirketi, a separate importer's warranty is issued by BenQ
 Mobile Telekomünikasyon ve Iletişim Hizmetleri Ticaret Limited
 Şirketi, Nida Kule, Degirmen Sk. No 12 Kat 19, Kozyatagi/Istanbul.

- Any other claims resulting out of or in connection with the device shall
 be excluded from this Guarantee. Nothing in this Guarantee shall
 attempt to limit or exclude a Customers Statutory Rights, nor the
 manufacturer's liability for death or personal injury resulting from its
 negligence.
- The duration of the Guarantee shall be extended by the time period used for services rendered under the terms of the Guarantee.
- Insofar as no Guarantee default exists, BenQ reserves the right to charge the customer for replacement or repair.
- The above provisions do not imply a change in the burden of proof to the detriment of the customer.

To invoke this Guarantee, please contact the BenQ telephone service. The relevant number is to be found in the accompanying user guide.

Kullanıcının (müşterinin) satıcı veya perakendeci ile ilgili herhangi bir tazminat talebine dokunmaksızın, müşteriye aşağıda belirtilen koşullar altında bir sınırlı Üretici

Garantisi verilecektir:

- Yeni cihazların ve parçalarının satın alma tarihinden itibaren 12 ay içinde imalat ve/veya malzeme hatalarından dolayı kusurlu çıkmaları durumunda, BenQ kendi seçimine kalmış bir şekilde ve bedelsiz olarak cihazı mevcut teknolojiyi yansıtan başka bir cihazla değiştirecek veya sözkonusu cihazı tamir edecektir.
- Eğer cihazdaki kusur yanlış kullanımdan veya kullanıcı kılavuzlarındaki bilgilere uyulmamasından kaynaklanıyorsa bu Garanti geçersiz olacaktır.
- Bu garanti, yetkili satıcı veya müşterinin kendisi tarafından gerçekleştirilen servisler (örn. Kurulum, yapılandırma, yazılım indirme) için uygulanmayacak veya bunları kapsayamayacaktır. Kullanıcı kılavuzları veya ayrı bir veri aracı üzerinde temin edilen yazılımlar Garanti kapsamında yer almayacaklardır. Garanti talebinde bulunmak için kanıt olarak satın alma tarihini içeren satın alma makbuzuna gerek olacaktır.
- BenQ tarafından değiştirilen ve BenQ'ya iade edilen cihazların veya parçaların mülkiyeti BenQ'ya ait olacaktır.
- Bu Sınırlı Üretici Garantisi Avrupa Birliği ülkelerinde ve Türkiye'de geçerli olacaktır. Türkiye'de satılan BenQ Mobile Telekomünikasyon ve İletişim Hizmetleri Ticaret Limited Şirketi ithalatı ürünler için ayrıca BenQ Mobile Telekomünikasyon ve İletişim Hizmetleri Ticaret Limited Şirketi, Nida Kule, Degirmen Sk. No 12 Kat 19, Kozyatagi/ İstanbul tarafından ithalatçı Garanti belgesi düzenlenmektedir.

- Cihazdan kaynaklanan veya onunla bağlantılı diğer talepler bu Garanti kapsamı dışında olacaklardır. Bu Garantide yer alan hiçbir şey, Müşterinin Yasal Haklarını veya imalatçının ihmalinden dolayı meydana gelen ölüm veya yaralanma bakımından imalatçının yükümlülüğünü sınırlandırmayacak veya kapsam dışı bırakmayacaktır.
- Garantinin süresi, Garantinin koşulları altında verilen hizmetler için kullanılan sure kadar uzatılacaktır.
- Garanti kapsamında herhangi bir kusur mevcut olmadıkça, BenQ değiştirme veya tamir için müşteriye fatura düzenleme hakkını saklı tutmaktadır.
- Yukarıdaki hükümler, kanıtlama yükümlülüğünde müşterinin zararına olarak bir değişiklik getirmemektedirler.

Bu Garanti kapsamında talepte bulunmak için, lütfen BenQ Mobil Ürünler Çağrı Merkeziyle irtibata geçiniz. İlgili telefon numarasını, ekli kullanım kılayızında bulabilirsiniz

If you encounter problems while using the phone, or if it performs erratically, consult the information in the chart below. If your particular problem cannot be resolved using the information in the chart, contact the dealer where you purchased the phone.

Problem	Possible cause	Solution
Deer	The network signal is too weak at your current location — for example, in a basement or near a tall building — because wireless transmissions cannot effectively reach it.	Move to a location where the network signal can be properly received.
Poor reception	The network is busy at the current time (during peak times, for example, there may be too much network traffic to handle additional calls).	Avoid using the phone at such times, or try again after waiting a short time.
	You are too far away from a base station for your network operator.	You can request a service area map from your network operator.
Echo or noise	Poor network trunk quality on the part of your network operator.	Hang up the phone and dial again. You may be switched to a better-quality network trunk or phone line.
	Poor local telephone line quality.	traine or priorio line.

Problem	Possible cause	Solution
	The standby time is related to your network operator's system configuration. The same phone used with different network operators' systems will not provide exactly the same length of standby time.	If you are located in an area where signalling is weak, shut off the phone temporarily.
Shortened standby time	The battery is depleted. In high-temperature environments, battery life will be shortened.	Use a new battery.
	If you are not able to connect to the network, the phone will continue to send out signals as it attempts to locate a base station. Doing so consumes battery power and will consequently shorten standby time.	Change your location to one where the network is accessible, or turn off your phone temporarily.
You cannot switch your phone on.	Battery power has been depleted.	Recharge the phone's battery.
	SIM card malfunction or damage.	Take the SIM card to your network operator for testing.
SIM card error	SIM card inserted improperly.	Insert the SIM card properly.
	Dirt on the SIM card contacts.	Use a soft, dry cloth to clean the SIM card contacts.

Problem	Possible cause	Solution
Unable to	SIM card invalid.	Contact your network operator.
connect to the network.	You are not within the network's service area.	Check the service area with your network operator.
	Poor signal.	Move to an open space, or if you are inside a building, move closer to a window.
You cannot answer incoming	You have activated Accept List or Reject List in the Privacy Manager option.	Go to Phone Book > Privacy Manager and select Off in order to deactivate this option.
calls.	You have activated the Call Barring feature.	Go to Settings > Call Settings > Call Barring, and then select Cancel All.
You cannot	You have activated the Call Barring feature.	Go to Settings > Call Settings > Call Barring, and then select Cancel All.
outgoing calls.	You have activated the Fixed Dialling No. feature.	Go to Settings > Call Settings > Fixed Dialling No. and select Off to turn this feature off.
PIN Code is blocked.	You have entered an incorrect PIN code three consecutive times.	Contact your network operator. If the network operator provides the SIM card's PUK code, use the PUK code to unlock the SIM card.
	The battery or battery charger is damaged.	Contact your dealer.
Battery will not charge.	• The phone's temperature is below 0°C or higher than 45°C.	Adjust the battery charging environment to avoid extremes of temperature.
	Poor contact between the battery and charger.	Check all connectors to make sure all connections have been properly made.

Problem	Possible cause	Solution
Unable to enter information in the Phone Book.	The Phone Book's memory is already full.	Delete unnecessary data from the Phone Book.
Unable to select certain features.	Your network operator does not support these features, or you have not applied for services that provide these features.	Contact your network operator.

This License Agreement ("Agreement") is between You and BenQ Mobile GmbH & Co. OHG ("BenQ"). The Agreement authorizes You to use the Licensed Software, specified in Clause 1 below, which may be included in your phone, stored on a CD-ROM, sent to You by electronic mail or over the air, downloaded from BenQ Web pages or servers or from other sources under the terms and conditions set forth below.

Read this Agreement carefully before using your phone. By using your phone or installing, copying, and/or using the Licensed Software, You acknowledge that You have read and understood the Agreement and agree to be bound by all of the terms and conditions stated below. You further agree that if BenQ or any licensor of BenQ ("Licensor") is required to engage in any proceeding, legal or otherwise, to enforce their rights under this Agreement, BenQ and/or its Licensor shall be entitled to recover from You, in addition to any other sums due, reasonable attorney's fees, costs and disbursements. If You do not agree to all of the terms and conditions of this Agreement, do not install or use the Licensed Software. This Agreement governs any Updates, releases, revisions, or enhancements to the Licensed Software.

1. LICENSED SOFTWARE. As used in this Agreement, the term "Licensed Software" means collectively: all the software in Your phone, all of the contents of the disk(s), CD-ROM(s), electronic mail and its file attachments, or other media with which this Agreement is provided and includes any related BenQ or third party software and upgrades, modified versions, updates, additions and copies of the Licensed Software, if any, distributed over the air, downloaded from BenQ Web pages or servers or from other sources.

- 2. COPYRIGHT. The Licensed Software and all related rights, without limitation including proprietary rights therein, are owned by BenQ, its Licensors or affiliates and are protected by international treaty provisions and all applicable national laws. This Agreement does not convey to You nor allow You to acquire any title or ownership interest in the Licensed Software or rights therein. The structure, organization, data and code of the Licensed Software are the valuable trade secrets and confidential information of BenQ, its Licensors or affiliates. You must reproduce and include the copyright notices with any permitted copies You make of the Licensed Software.
- 3. LICENCE AND USE. BenQ grants to You a non-exclusive, non-transferable end user right to install the Licensed Software or use the Licensed Software installed on the phone. The Licensed Software is licensed with the phone as a single integrated product and may be used with the phone only as set forth in these licensing terms.
- 4. LIMITATIONS ON LICENCE. You may not copy, distribute, or make derivative works of the Licensed Software except as follows:
- (a) You may make one copy of the Licensed Software, excluding the documentation, as an archival backup copy of the original. Any other copies You make of the Licensed Software are in violation of this Agreement.
- (b) You may not use, modify, or transfer the right to use the Licensed Software other than together with the accompanying hardware or copy the Licensed Software except as expressly provided in this Agreement.
- (c) You may not sublicense, rent or lease the Licensed Software.
- (d) You may not reverse engineer, decompile, modify, or disassemble those Licensed Software programs except and only to the extent that such activity is expressly permitted by applicable law notwithstanding this limitation

Parts of the Licensed Software may be supplied by third parties and may be subject to separate licence terms. Such terms are set out within the documentation.

- 5. MISUSE OF THE LICENSED SOFTWARE OR DATA GENERATED BY THE LICENSED SOFTWARE IS STRICTLY PROHIBITED BY BENQ, MAY VIOLATE GERMAN, U.S. AND OTHER LAWS AND MAY SUBJECT YOU TO SUBSTANTIAL LIABILITY. You are solely responsible for any misuse of the Licensed Software under this Agreement and for any liability or damage related in any way to your use of the Licensed Software in violation of this Agreement. You are also responsible for using the Licensed Software in accordance with the limitations of this Agreement.
- 6. TERMINATION. This Agreement is effective from the first date You install, copy or otherwise use the Licensed Software. You may terminate this licence at any time by deleting or destroying the Licensed Software, all back up copies and all related materials provided to You by BenQ. Your licence rights terminate automatically and immediately without notice if You fail to comply with any provision of this Agreement. The rights and obligations under sections 2, 5, 6, 7, 9, 12 and 13 of this Agreement shall survive the termination of this Agreement.
- YOU ACKNOWLEDGE THE LICENSED SOFTWARE IS PROVIDED "AS IS" AND NEITHER BENO NOR ANY OF ITS LICENSORS MAKE ANY REPRESENTATIONS OR WARRANTIES. EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR THAT THE LICENSED SOFTWARE WILL NOT INFRINGE ANY THIRD PARTY PATENTS, COPYRIGHTS, TRADEMARKS OR OTHER RIGHTS. THERE IS NO WARRANTY BY BENO OR ITS LICENSORS OR BY ANY OTHER PARTY THAT THE FUNCTIONS CONTAINED IN THE LICENSED SOFTWARE WILL MEET YOUR REQUIREMENTS OR THAT THE OPERATION OF THE

LICENSED SOFTWARE WILL BE UNINTERRUPTED OR ERROR-FREE AND BENQ AND ITS LICENSORS HEREBY DISCLAIM ANY AND ALL LIABILITY ON ACCOUNT THEREOF. NO ORAL OR WRITTEN INFORMATION OR ADVICE GIVEN BY A BENQ REPRESENTATIVE SHALL CREATE A WARRANTY OR IN ANY WAY AFFECT THIS DISCLAIMER. YOU ASSUME ALL RESPONSIBILITY TO ACHIEVE YOUR INTENDED RESULTS AND FOR THE INSTALLATION, USE, AND RESULTS OBTAINED FROM IT.

- 8. NO OTHER OBLIGATIONS. This Agreement creates no obligations on the part of BenQ other than as specifically set forth herein.
- 9. LIMITATION OF LIABILITY. IN NO EVENT SHALL BENO, ITS EMPLOYEES, LICENSORS, AFFILIATES OR AGENTS BE LIABLE FOR ANY DIRECT DAMAGES, LOST PROFITS, DATA OR BUSINESS, OR COSTS OF PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES. PROPERTY DAMAGE, INTERRUPTION OF BUSINESS OR FOR ANY SPECIAL, INDIRECT, INCIDENTAL, EXEMPLARY, ECONOMIC, PUNITIVE OR CONSEQUENTIAL DAMAGES, HOWEVER CAUSED, WHETHER ARISING UNDER AND CONTRACT, NEGLIGENCE, OR OTHER THEORY OF LIABILITY, OR ARISING OUT OF THE USE OF OR INABILITY TO USE THE LICENSED SOFTWARE, EVEN IF BENO IS ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. THE LIMITATION OF LIABILITY SHALL NOT APPLY IF AND TO THE EXTENT BENQ'S LIABILITY IS MANDATORY UNDER THE APPLICABLE LAW E.G. ACCORDING TO PRODUCT LIABILITY LAW OR IN THE EVENT OF INTENTIONAL MISCONDUCT, PERSONAL INJURY OR DEATH.

10. TECHNICAL SUPPORT. BenQ and its Licensors have no obligation to furnish You with technical support unless separately agreed in writing between You and BenQ or the applicable Licensor.

BenQ and where applicable its Licensors in the Licensed Software shall be free to use any feedback received from You resulting from your access to and use of the Licensed Software for any purpose including (without limitation) the manufacture, marketing and maintenance or support of products and services.

- 11. EXPORT CONTROL. The Licensed Software may include technical data and cryptographic software and is subject to German, European Union and U.S. export controls and may be subject to import or export controls in other countries. You agree to strictly comply with all applicable import and export laws and regulations. Specifically, You agree, to the extent required by U.S. Export Administration Regulations, that You shall not disclose or otherwise export or re-export the Licensed Software or any part thereof delivered under this Agreement to (a) Cuba, Iran, Iraq, Libya, North Korea, Sudan, Syria or any other country (including a national or resident of such country) to which the U.S. has restricted or prohibited the export of goods or services.
- 12. APPLICABLE LAW AND FORUM. The laws of Germany govern this Agreement. No choice of law rules of any jurisdiction will apply. The courts in Munich shall settle any disputes arising out of or relating to this Agreement provided you are a merchant.
- 13. MISCELLANEOUS. This Agreement represents the entire agreement between You and BenQ relating to the Licensed Software and (i) supersedes all prior or contemporaneous oral or written communications, proposals, and representations with respect to its subject matter; and (ii) prevails over any conflicting or additional terms of any acknowledgement or similar communication between the parties during the term of this Licence. Notwithstanding the foregoing, some products of BenQ may

require You to agree to additional terms through an on-line "click-wrap" licence, and such terms shall supplement this Agreement. If any provision of this Agreement is held invalid, all other provisions shall remain valid unless such validity would frustrate the purpose of this Agreement, and this Agreement shall be enforced to the full extent allowable under applicable law. No modification to this Agreement is binding, unless in writing and signed by a duly authorised representative of each party. This Agreement shall be binding on and shall inure to the benefit of the heirs, successors, and assigns of the parties hereto. The failure of either party to enforce any right resulting from the breach of any provision of this Agreement by the other party will not be deemed a waiver of any right related to a subsequent breach of such provision or any other right hereunder. Notwithstanding anything to the contrary in this Agreement, BenQ and/or its licensors may enforce its rights, including but not limited to copyright, trademark or trade names, in accordance with the rules of law in each country.

<Memo>
